

AI台股新模型每日收盤報告

requested 2026-07-08 · data 2026-07-08 · report-only diagnostic

Regime 健康強勢但個股觸發未齊	Branch blocked_consensus...	Main blocked 尚未可選	Coverage blocked
-----------------------	--------------------------------	----------------------	---------------------

今日模型判讀

C2 gate: True
Consensus trigger: False
Route support score: None
Reason: C2 exact MA60 and exact consensus trigger / route_support max1 not fully materialized for 2026-07-08

RS20 Top3 Reference

- 1. 8261 富鼎 RS20=1.0909
- 2. 3055 蔚華科 RS20=0.8945
- 3. 6182 合晶 RS20=0.8102

Market Health

2026-07-08 EOD anchor 0050 close: None turnover: None
2026-07-08 EOD anchor 00631L close: None turnover: None
0050 latest field date: 2026-07-08
0050 return 20D / 40D / 60D: 0.0246376811594202 / 0.0949922733177657 / 0.3157568487305908
0050 price vs MA60: 0.0722771793223893
0050 BIAS20 / BIAS60: None / 0.0722771793223893

風險與邊界

本報告是 vNext 新模型 report pipeline 樣本，不是自動下單或正式交易規則。
若 requested date 欄位未齊，只能顯示 latest available reference，不能包裝成今日 selected。
Adjusted close / cash-bear classifier / formal-ready 仍保留 blocker。
formal model changed=false · trade_decision_changed=false · report_changed=true · not live rule=true
Low base score: reference_only_layer4_primary80_blocked，只作 component/reference，不作 hard filter。

所有後續主要績效結論必須使用 net after transaction cost；gross/no-cost 只能 secondary。

Low Base Score Reference

component / overlap audit only · not selected rule · no hard filter

定位

status: reference_only_layer4_primary80_blocked

exact Layer4 primary80 ready: False

overlap audit ready: True

placement: Layer4 ranking component; BIAS/RS/risk reuse Layer2, pullback semantics stays Layer3.

Balanced Top10 Reference

1. 8070 長華* score=0.7601
2. 2231 為升 score=0.7526
3. 1536 和大 score=0.7493
4. 8937 合騏* score=0.7462
5. 6153 嘉聯益 score=0.7451
6. 2498 宏達電 score=0.7416
7. 1460 宏遠 score=0.7413
8. 6550 北極星藥業-KY score=0.7380
9. 1305 華夏 score=0.7375
10. 6505 台塑化 score=0.7370

Overlap Policy

既有 BIAS / overhear / RS / pullback / risk 欄位不重複砍股票。

low_base 補的是低基期位置 + 未過熱 + RS改善 + 成交改善的可比較分數。

若未來要作 selected rule，必須由 Experiments 先做 net-after-cost diagnostic。
